Application/Control Number: 10/620,612

Art Unit: 2186

Attorney's Docket No.: M4065.0322/P322-A

IN THE UNITED STATES PATENT AND

TRADEMARK OFFICE

In re application of: Stubbs et al. Group: 2186

Serial No.: 10/620,612 Examiner: Tuan Thai

For: INTEGRATED SEMICONDUCTOR MEMORY CHIP WITH PRESENCE

DETECT DATA CAPABILITY.

1. This action is responsive to amendment filed September 28, 2006. Claims 1-33, 45-52 and 57-59 have been canceled. Claims 34-44 and 53-56 are now allowed.

REASONS FOR ALLOWANCE

2. The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record do not teach nor suggest, either alone or in combination, all the limitations of the amended claims of the current invention (claims 34 and 53). The discussion of the reasons for allowance shall be directed to claim 34 in which the Examiner shall designate as the primary invention in this application; however, the reasons for allowance will also apply to other indicated independent claim (claim 53).

Application/Control Number: 10/620,612

Art Unit: 2186

Particularly, the prior arts of record do not teach nor suggest a circuit for encoding presence detect data comprises a first signal encoding portion for encoding first presence detect information relating to a random access semiconductor memory chip, said first presence detect information being disposed in a hardwired circuit of said random access semiconductor memory chip during the manufacturing of the random access semiconductor memory chip, the first presence detect data having one of a first value associated with a short circuit within the hardwired circuit and a second value associated with an open circuit within the hardwired circuit; and a second signal encoding portion for encoding second presence detect information relating to the random access semiconductor memory chip, the second presence detect information being disposed in a programmable circuit of the random access semiconductor memory chip, the programmable circuit programmed subsequent to manufacturing of the random access semiconductor memory chip. In light of the foregoing, claims 34 and 53 of the present application are found to be patentable over the prior arts.

Claims 35-44 and 54-56 further limit the allowable independent claims 34 and 53. These claims are therefore allowable for the same reason as set forth above.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to

Application/Control Number: 10/620,612

Art Unit: 2186

avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan V. Thai whose telephone number is (571)-272-4187. The examiner can normally be reached on from 6:30 A.M. to 4:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mathew M. Kim can be reached on (571)-272-4182. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
